

BHAVYA JAIN

Product Manager — AI-Driven Products | 0→1 Founder Experience

Tampere, Finland | +358 469023068 | bhavya2703@gmail.com | linkedin.com/in/bhavyabafna

SUMMARY

Product manager with hands-on 0→1 experience founding and building an education-technology platform from concept to live product. Combines product discovery, UX design, and technical delivery with direct experience shipping AI-driven features (LLM-based guidance tools, agentic research workflows). Background in enterprise project delivery (Nokia) and Agile/Scrum execution. Looking to bring founder-level product ownership and applied AI experience to a product team.

EXPERIENCE

Founder & Product Lead — YAC (Your Abroad Consultant)

Aug 2023 – Present

0→1 education-technology platform for study-abroad guidance

- Founded and led product strategy for an education platform serving students navigating study-abroad admissions and financing, from initial concept through live prototype.
- Designed the end-to-end UX/UI prototype covering program discovery, document management, and personalized student services; moved the product from prototype into hands-on technical build.
- Built and shipped two AI-driven features: a guidance tool that breaks complex, multi-step academic and visa processes into plain-language steps, and an autonomous research agent that uses web search and tool-calling to surface deadlines and requirements — both tested and iterated on with real students.
- Owned website, marketing, and growth strategy; ran conversion-funnel optimization across the student journey, working directly with early users to prioritize the roadmap.
- Led cross-functional execution across product, engineering, and go-to-market with no dedicated team — functioning as PM, designer, and technical lead simultaneously.

IT Project / Test Management Trainee — Nokia

Feb 2022 – Aug 2022

- Supported delivery of the Nokia HR systems platform (time and people management reporting) within the GFS team, reporting to the head of GFS and head of product.
- Ran sprint planning, backlog tracking, and delivery alignment using Agile methodologies and Jira across a distributed, cross-functional team.
- Performed manual testing and QA validation across design, code, and functionality for internal training and workforce tools ahead of release.

MATLAB Student Ambassador — MathWorks

Nov 2021 – Jul 2022

- Built and grew a 150-student user community for MATLAB and Simulink, running 10+ events and providing direct technical support.
- Planned and executed 15+ marketing campaigns and 30+ content activations as the brand's representative within the university.

Business Advisor — Aira

Jul 2018 – Jan 2025

- Advised a 3D animation and motion-graphics studio from its early formation through growth, supporting production efficiency and new partnership development across Asia, Europe, and North America, alongside primary studies and roles in Finland.

SKILLS

Product Strategy & Discovery · 0→1 Product Development · AI/LLM Product Features (prompt engineering, RAG, agentic tool-use) · UX/UI Design · Agile & Scrum Delivery · Growth & Conversion Optimization · Stakeholder & Cross-functional Management · Python (working proficiency)
